

# Absolute Harmony

FS-Elliott air compressors are the easiest to maintain and service in the industry. Our basic compressor designs are in harmony with the best maintenance practices and procedures. The gearing, intercoolers, aerodynamic parts, lubrication system and Control System are all independently accessible. Maintenance of any one of these components does not require the disassembly of other components or the exchange of large assemblies. Inspection and maintenance of the bearings and seals and rotors is another example of our Ease-Of-Maintainability philosophy. All maintenance and repairs can be performed at site. We are the OEM – the most knowledgeable for maintaining your air compressor package. And, of course, our **TEAM** warrants all of our services.

FS-Elliott Co., LLC reserves the right to modify the design or construction of the equipment described in this brochure and to furnish it, as altered, without further reference to the illustrations or information contained herein.

**Repairs** – Should they be required, most repairs are handled locally on-site. However, in rare instances or emergency situations, ISO-certified authorized shops are available and fully capable of performing the required repairs. The experienced service **TEAM** is dedicated to ensuring that emergency situations will be handled with urgency 24 / 7 / 365.

**Rerates** – Rerating of existing compressors to a new set of operating conditions is often the most economical means to meet a system's changed compressed air demands. We can also provide new design innovations and upgrades that enhance reliability and reduce life cycle cost.

**Customer Benefits** – The absolute best quality and service in the industry is the "Perfect Balance" and "Absolute Harmony" our **TEAM** provides.

# Perfect Balance

At FS-Elliott we take balance seriously and to the limit. Everything that we do is in balance. Starting from the initial research and development for a new state-of-the-art compressor design to the care and maintenance provided to a legacy machine, our goal is nothing less than to provide our customers with the very best equipment and quality care.

At the core of that balance is our partnership with carefully-selected, factory trained and certified distributors and service providers. Together our **TEAM** provides our valued customers with on-site and on-time services, parts and equipment that keep their up-time unrivalled in the industry. Our service **TEAM** is committed to providing this quality service throughout the life of the equipment.

FS-Elliott's "oil free" air compressors are highly engineered and carefully crafted to provide years of reliable operation. Our air compressors are known to be the most robustly built and reliable in the industry; but when service is required, our **TEAM** is your assurance that all of your needs will be taken care of quickly, professionally and completely – our goal is your total satisfaction and a long term relationship. We have the local people, the experience, the parts, and the facilities to handle your every service need. Remember - that when making that initial purchase decision a most critical factor in your evaluation process should be the OEM's service **TEAM**. Make it easy, an FS-Elliott air compressor and **TEAM** is the right choice every time.

**Quality Product Line & Services** – the FS-Elliott **TEAM** balance begins with meticulous attention to detail, a broad product line of oil free air compressors, control systems and aftermarket service capabilities that will meet the most demanding needs of the industry.

**Installation and Startup** – Our service **TEAM** personnel are fully qualified to handle a wide range of commissioning services quickly and correctly thus ensuring years of reliable operation. These services range from qualified advice and assistance for your own installing and commissioning crew to providing the total turnkey installation – including project management, supervision, all of the craft labor and tools to handle the entire job.

**Training** – we offer a wide range of operator and maintenance training programs. The training can be performed in one of our facilities or conducted at your location. We offer a variety of standard self contained packages or can customize a program to suit your specific needs.

**Parts** – The correct service parts and access to them on a timely basis is critical to compressed air users. Therefore, we maintain a large inventory of quality-made OEM parts.

**Maintenance** – Maintenance programs can be customized to your specific needs. A qualified service technician can be provided on an "as needed" basis or a wide range of custom service programs can be developed for your specific needs. We can also provide regularly scheduled visits by local service personnel. Remote monitoring is also available which enables you or one of our **TEAM** members to monitor the compressor's operation from a remote location.
